

ZoneSwap

| The Lite Paper V1.0

Introduction

ZoneSwap is a cross-network decentralized asset management system from city to community designed to bring a future of stability to DeFI by enabling users to quickly build a highly diversified portfolio

ZoneSwap wants to leverage any existing community area of the traditional market to modern markets by applying planting and profiting in the future.

The entire protocol is overseen by the ZoneSwap token, which provides profit sharing, governance, and helps grow the DeFI ecosystem utilizing the wisdom of the zoneSwap

community for mapping areas that create community circles. Network ecosystems in every place so that users can build an economy easily, effectively, and efficiently. and efficient

Yield Farming ZoneSwap

In the world of Cryptocurrency Yield Farming is a breakthrough solution for the world of a new era who wants to produce crypto currency by mining the crypto you have, miners or you can say farmers will benefit by investing capital to earn profits. Traditional markets generally only have the authority to provide loans, therefore customers who lend will return the funds along with interest to the bank.

Decentralized finance (DeFi) is a solution for future miners or farmers without intermediaries. The role of the bank which was originally as the center for controlling the funds, was replaced with technology *Smart contract* in the blockchain.

Decentralized Finance or Decentralized Finance (DeFi) is managed by the blockchain. This innovation is loved by many people because the interest from zoneswap will be seen as promising for investment. in the future.

Decentralized Exchange ZoneSwap

Yield farming ZoneSwap the future solution to get prizes or rewards in the form of ownership of Crypto currencies using a liquidity protocol that is without permission or permission less. making the zoneSwap community get passive income, a centralized ecosystem built on the Binance Smart Chain network. Yield

Farming can provide HODL to yield farmers to own Crypto currency and generate other Crypto assets. By using Liquidity Providers users who place their Crypto assets into liquidity pools.

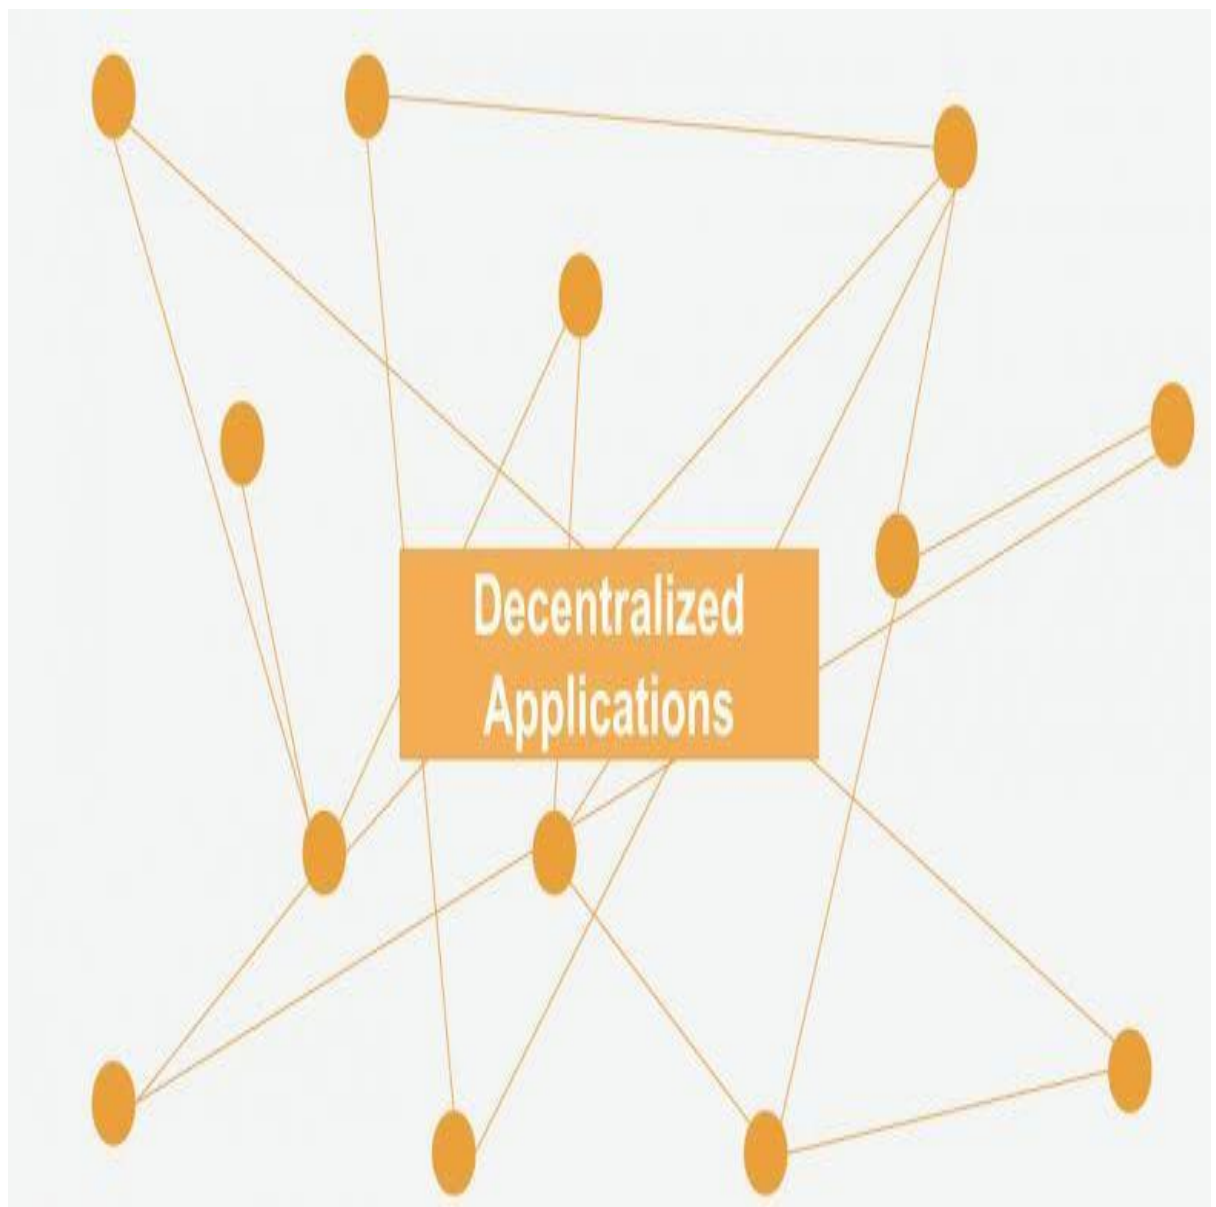

The results of the Yield Farming Return are calculated using the Annual Percentage Yield (APY) which is estimated accurately and is based on the competitive and fast-moving condition of the yield farming market. this makes the reward or return also quality quickly.

Autonomous decentralized applications (Dapps) that allow CryptoCurrency buyers or sellers to trade. This type of exchange infrastructure gives the community or users the freedom to act as custodians and issue IOUs for users to trade on the platform.

Decentralize Exchange operates an automated order book (or automated market maker) in its trading. this makes them “truly peer-to-peer”

Our Token

What Zone Swap Token

1. Instant Operation

The system implemented by Zoneswap has met the standards for exchanging and storing funds using the yield farming system.

Token Sale Term

Name : ZoneSwap

Max Token : 150,000,000 ZONE

Price : 0.012 USD

Currency : BNB

Min Purchase: 0.1 BNB

Roadmap

June 2021

Launch Airdrop

July 2021

Launch Token Sale, Launch Dexswap, Launch Stake Reward and Yield Farming System, Listed on PancakeSwap, Liquidity Lock and Pool, Listed on Hotbit

August 2021

Launch Trading Competition, Listed on MXC

September 2021

Big News Listed 2 New Exchange, Opening Launchpad

October 2021

Big Partners, Launch Stake Reward, Token buy back

November 2021

Event Hold ZONE, Listed Major Exchange, New Launchpad

December 2021

ZONE reward for ZoneSwap Trader, Token buy back
